PROFILE

I build fast, responsive interfaces in React and Next.js — and I care about the part most developers skip: making sure the client actually understands what they're getting. Working as an independent freelancer, taking projects from a first requirements call to a live, deployed product with no one in between, and currently expanding into AI-driven automation and workflow integrations.

TECHNICAL SKILLS

FRONTEND

- React.js
- Next.js
- TypeScript
- JavaScript
- Redux
- Redux Toolkit
- Material UI
- Tailwind CSS
- HTML5
- SASS/SCSS

BACKEND

- Node.js
- Express.js
- MongoDB
- MySQL
- PostgreSQL

OTHER / DEVOPS

- React Native
- Docker
- Git
- Figma
- Sanity CMS
- Responsive Design
- API Integration
- AI-Assisted Development

LANGUAGES

- English
- Daily client comms / B1
- Ukrainian
- Native
- Russian
- Fluent

WORK EXPERIENCE

Frontend Developer

Bifrost-studio · Remote

09.2025 – 03.2026

- Part of a small team that shipped 5 commercial projects in a 1.5-month sprint — every one landed on the client's deadline, no extensions needed.
- Took ownership of UI implementation and REST API integration, working directly against designer handoffs instead of waiting on backend specs to be finalized first.
- Caught and fixed inconsistencies in the shared codebase during code review that would've caused visual bugs across two other client projects.

React Developer | SaaS Developer | AI Automation

Freelance · Remote

2025 – PRESENT

- Work directly with international clients end-to-end — from the first requirements call to a live, deployed product — without a project manager in between.
- Built and shipped e-commerce, fitness, and beauty-brand platforms in React, Next.js, and TypeScript, each integrated with a real backend or CMS rather than static content.
- More than half of my clients have come back for a second project or referred another client — the strongest signal I have that the work holds up after delivery.

TECHNICAL PROFICIENCIES

Glow & Grace

- NEXT.JS
- TYPESCRIPT
- TAILWIND
- SANITY CMS

Developed a premium web platform for a Ukrainian beauty brand to streamline operations and enhance the user experience

Tech stack: Next.js, TypeScript, Tailwind, Sanity CMS

SOFT SKILLS

Dedicated to open communication that keeps projects on track. I focus on proactive alignment and concise messaging to eliminate friction, ensuring the team remains synchronized and focused on delivering quality results.

HOW I WORK

- I tell you about a blocker the day it happens, not the day it's due.
- I use AI tools to move faster on boilerplate — not to skip understanding the code.
- If a deadline is at risk, you hear it from me before you have to ask.

EDUCATION

- **Bachelor - Computer Science**
Central Ukrainian National Technical University
9/2023 - PRESENT
- **Frontend React Developer**
Shpp IT-school
9/2023 - 2/2024
- **Computer Science**
Lyceum "Maximum"
9/2021 - 5/2023
 - Advanced English and computer science
 - C++ and frontend development

Karpaty International

HTML5

JAVASCRIPT

SCSS

WORDPRESS

Developed a freelance solution for a Ukrainian educational institution, balancing modern performance with vibrant cultural aesthetics.

Tech stack: HTML5, JavaScript, SCSS, Wordpress

View Project ↗

Forge Gym

NEXT.JS

TYPESCRIPT

TAILWIND

FRAMER MOTION

Built to convert visitors into sign-ups on mobile, where most of their traffic actually comes from. Fast load, smooth animations, no bloated template feel.

Tech stack: Next.js, TypeScript, Tailwind, Framer Motion
